

Senior Housing Opportunities

Victoria Lifeline is an excellent tool for providing security to your tenants and risk management for you. Providing a way for your tenants to access help is excellent value at a low cost and can differentiate your building from other facilities.

Built-in building-wide service can be arranged as part of new construction or renovations. Common areas as well as the tenant suites can easily be monitored in this way. Alarm monitoring can be done by the Philips Lifeline Response Centre, facility staff, or a combination. Alarm response can be provided by the tenant's friends and family or provided by facility staff.

Traditional suite-by-suite Lifeline service is available at any time with no capital outlay required, just a low monthly per-suite fee. The Philips Lifeline Response Centre staff can notify staff or tenant friends and family responders as desired.
